Our water

This place has chosen to serve natural and sparkling drinking water treated and microfiltered with the support of GWT Service Srl in accordance with Legislative Decree 181/2003 and subsequent additions.

The microfiltration system used complies with ministerial provisions, eliminates any impurities present in mains water such as sand, rust, pebbles and particulate matter in general, removes chlorine, and all without changing the excellent organoleptic properties of the water, maintains the most balanced content of mineral salts, enhancing the quality and taste of the water.

Drinking microfiltered water means drinking safe water, which has not traveled hundreds of kilometers even under the sun, to be then put on our table. The quality of life also depends on what we drink

Via Trevignano Romano n. 5/7
00135 Rome
